

LIONTEX

FLOOR AND RENOVATION PROTECTION

SUPERIOR SITE PROTECTION

Liontex is a 100% Finnish-made surface protection product designed to protect floors, walls, staircases, elevators, door frames and other surfaces from damage during construction and renovation work.

Liontex XXL -sheets offer a versatile alternative to traditional protection materials such as hardboard. Thanks to its non-staining composition, no additional protective layer is needed, unlike with hardboard. The M-sheet is suitable for lighter protection needs.

PRODUCT SPECIFICATIONS

Liontex XXL Protection Sheet

- **1500 x 1000 x 2 mm**
- **1160 g/m²**
- **400 pcs/pallet = 600 m²**

Liontex M Protection Sheet

- **1500 x 1000 x 1,2 mm**
- **725 g/m²**
- **700 pcs/pallet = 1050 m²**

AN ECO-FRIENDLY AND COST-EFFECTIVE SOLUTION

Liontex sheets are made from eco-friendly, recyclable and non-toxic materials. Lightweight yet durable, they are easy to handle and quick to install. They effectively protect surfaces against wear, moisture and dirt, and can be reused multiple times, reducing waste and overall construction site costs.

After use, the sheets can be recycled with cardboard. Choosing Liontex for surface protection helps construction sites meet their environmental and sustainability goals.

INSTALLATION TECHNIQUE

Liontex sheets are joined together with tape to create a continuous protective surface. We recommend using HPX's non-stretching Pro and masking tapes. Thanks to their non-stretching property, even long runs are easy to install. The tapes are PE-coated fabric tapes with rubber adhesive. For sensitive surfaces, we recommend the Clean Removal tape.

Choose the tape according to the surface to be protected:

- **Orange Pro Tape** for general use**.** Waterproof and easy to tear by hand.
- **Blue Masking Tape** for areas subject to particularly heavy wear. Can be torn by hand.
- **Clean Removal Tape** for taping on sensitive surfaces. Its UV resistance allows residue-free removal up to 6 weeks after application (does not apply to windows).

When using Pro and masking tapes, the construction company ensures their recycling obligations are met, even if tape ends up with Liontex protective sheet in recycling, unlike when using a PVC tape.

WHY CHOOSE LIONTEX

DESIGNER

- Standard size, easy to measure.
- Easy to modify for different site needs.
- Domestic, plastic-free, non-toxic, and ecological alternative.
- Non-conductive and does not generate static electricity.
- Breathable material.
- Non-staining and water-resistant.
- User-friendly.

DEVELOPER

- One product for multiple protection needs simplifies ordering and logistics.
- Moisture-resistant and quick-drying.
- Breathable material lets seams and floors dry.
- Withstands heavy machinery without breaking.
- Adapts to uneven surfaces.
- Supports company's sustainability goals.
- Workers will thank you!

COST SAVINGS

- Durable and long-lasting.
- Reusable.
- Affordable to recycle due to the material.
- Dust-free — no need for face masks during processing.
- Less post-cleaning required.
- No need for underlay paper — one product is enough!
- Fast processing and installation save working time.

USER

- Lightweight transport and handle — reduces physical strain.
- Quick and easy to prosess and install, even in tight spaces.
- No exposure to dust or chemicals.
- Easy to form corners, edges and wall upturns.
- Quick and effortless to remove or reposition.

ENVIRONMENT

- Responsible choice!
- 100% Finnish product — lower transport carbon footprint.
- Made from cellulose.
- Non-toxic and plastic-free — no environmental burden.
- Long-lasting.
- Recyclable — can be disposed of like cardboard.
